Market Remains Strong While Generics Weaken
Opportunities Evident In Sight-Unseen Market

The Central States Numismatic Society show in St. Louis was welcome because it allowed dealers to search for the "fresh" material that they have been seeking. Unfortunately for many of those dealers, the amount of fresh material that they hoped might appear never quite materialized. Still, there was business being done and those that acted quickly received the largest benefits. Dealers told us that much of the business that they were doing was strictly dealer-to-dealer wholesale transactions. The bourse was active in this regard especially since many wanted to come home with some new purchases. Some commented that there wasn't enough public in attendance to really make a difference. However, dealers carried the want lists of their customers with them and tried to fill some of those needs in Saint Louis. One dealer that we spoke with said it was very tough locating any fresh material because there "just isn't any around." Still, dealers were able to have a strong show because of the wholesale business being done. Strong demand was chasing after Carson City Morgan Dollars. We have been writing about the "CC" Morgan Dollars coming back to life after an earlier softer period. The interest for these Morgans is still growing and this was clearly evident in Saint Louis. It was interesting to see very impressive demand targeting high grade Mint State and Proof Type. Proof 65 and MS65 and better Type is selling. Dealers that couldn't find fresh material instituted Plan B by purchasing high grade Type and rare better dates. Depleted inventories have made these acquisitions necessary and so dealers want to be sure that they have a sufficient selection to offer to their customers. Better date Gold was hot in Saint Louis. A strong collector base is fueling this demand that's seeking Charlotte, Dahlonega, New Orleans, San Francisco and Carson City Gold. There are some Philadelphia Mint dates that are also tough to find as well. Increased demand for rare Gold and Carson City Morgans is a solid indication that the market is healthy.

The overall state of this week's sight-unseen market is telling a slightly different story. Some discounting is taking place in select areas and Bids are being lowered. Common date Morgan Dollars are declining in grades MS64 thru MS67. Many of these decreases are small but it points to a redistribution of funds. Some of this money is chasing the Carson City issues with 1891-CC and 1892-CC very much sought-after at the moment. Better date Prooflike Morgans are also moving higher. Dealers need to seize the opportunity when select dates appear at auction but often these purchases could leave them in an overextended position. Consequently, they may need to blow out some material to cover the bills. Often that means the generics may suffer. Look at Mint State Gold Type. Gold bullion has been trading at lower levels with Spot now at $421.60 per ounce. Therefore it's easy to see why common date Gold Type has been trading at reduced levels at public auction and on the bourse. Proof Singles and late date Walking Liberty Half Dollars are also prime candidates for quick sale when money is needed. The sight-unseen market is flourishing in issues that are ripe for easy sale. However, these declines may translate into opportunity for those dealers that pay attention and act quickly. Several coins sold at public auction in St. Louis for levels that are below their current sight-unseen Bid. These auction sales may mean instant profit for those jumping on the opportunity.

The May 10-11 auction of United States Gold, Silver and Copper coins along with Part IX of the John J. Ford, Jr., Collection by Stack's realized more than $5.8 million in New York. We have listed a few of the many highlights from this sale.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highes nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XX No. 20 May 20, 2005 Single copy price $4.00

Gold Commems Glitter Generic Dollars Continue Slide

The sight-unseen market continues to proceed somewhat selectively. This has been the template being used by dealers throughout most of 2005. Coins are being bought for the direct purpose of a prearranged sale from a client want list, or for the inclusion in one's inventory, replacing a previously sold example. Keeping a fresh inventory simply makes good business sense. Dealers are also becoming very cognizant of their own cash flow as it really is the life blood of their business. They can't afford to own coins that may look impressive in the shop or on their web site but are out of reach of most collectors and may take too long to sell. Many of these more specialized rare coins are tying up valuable funds that could be used immediately for those popular items that result in more frequent transactions. Consequently, dealers strive to have an inventory that mostly includes material that is in demand today and therefore more salable.

What is moving higher this week? Gold Commemoratives are surging once again in a major way. Plus signs are seen blanketing our sight-unseen Bid columns for nearly all issues in this small series. Quality is the theme as the increases are appearing for examples grading MS64 thru MS67. This is quite a change from earlier in the year when dealers were primarily targeting the Circulated and lower Mint State grades. These Commems appeal to many serious veteran collectors as well as beginners because their price tag is generally in the four-figure range. Franklin Half Dollars are also attracting substantially higher sight-unseen Bids. Take a look at the PCGS MS65 grade column, many of these issues from 1955 thru 1958-D have all but doubled since our last report. Check out 1953-S Bids for Franklins with Full Bell Lines, quite an amazing difference in price than for those without the FBL designation. Franklin Half Dollars have been very thinly traded with quite a few selling at auction for well below their existing sight-unseen Bid levels. Some astute dealers maybe capitalizing on these nuances within the market. The opportunity to make easy money seems to be out there nearly every week as coins sell at auction for levels that are below posted buy prices. Several Walking Liberty Half Dollars are also among the issues moving higher within this report. The greatest Bid increases are seen for those Walkers dated from 1934 thru 1939 in PCGS MS65 and PCGS MS66. These middle dates are desired because it is believed that they represent a good value at the present levels. Some examples can be confirmed by examining the population figures in comparison to like priced Walkers found in the later years. Dealers are hopeful that these higher Bids will result in some coins being brought to market. This strategy is also being applied to early Philadelphia Mercury Dimes in MS67FB, as they too are also entertaining Bid increases. Ready buyers are waiting for these special dates and dealers could have instant sales if they could just locate the coins.

Several series are continuing to experience some slight discounting, primarily for the common dates that are readily available, while the better dates remain strong. Morgan Dollars are an excellent example for this scenario. Generic Dollars are softening once again in grades MS64, MS65 and MS66 as other scarcer dates are increasing. New Orleans Mint issues are in strong demand with 1893-O thru 1897-O moving higher in Choice Uncirculated. The MS63 grade is desirable because these "O" Mints get rather expensive in MS64 and above. Also, the waiting factor must play a role as collectors will be more content to own an MS63 instead of waiting a lot longer to find a higher quality example. Standing Liberty Quarters are being hit with some weakness, mostly the common dates in the higher grades. Gold bullion is in a holding pattern and so is Mint Gold Type. Except for the $3 Princess, Gold Type has been less than spectacular lately.

Shows and auctions are about to dominate dealer's already busy schedules. May is rapidly coming to a close and with it begins the Whitman Coin and Collectibles Atlanta Expo May 26-28. American Numismatic Rarities will feature the J. B. Worthington Collection May 24-25 (highlights below). Stack's will host Part X of the John J. Ford, Jr. Collection May 26. Next up is the Long Beach Expo, slated for June 2-4 in California. Of course this larger west coast show is also surrounded by several public auctions.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

To be

TOP DOG...

... you need a perfect pedigree

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

CERTIFIED COIN DEALER newsletter

Vol. XX No. 21 May 27, 2005 Single copy price $4.00

Busy Market Heads To The West Coast
Common Date Dollars Drop

The market is finishing May in style, with strong demand evident for coins that meet some stiff requirements by rather sophisticated collectors. Many of these collectors have had an advantage of being able to pick the brains of knowledgeable, experienced dealers. Rare coins have many fragmented parts and we have seen specialists publish books that have given confidence to those individuals working on a particular series. These collectors have been doing their homework with access to more information and now are beginning to assemble some very nice collections. Generally the requirements desired by them for a particular rare coin is strict, but once found price doesn't seem to be a stumbling block to prevent its quick acquisition. First and foremost today's buyers are looking for **quality pieces** to add to their collections. It may seem like a broken record but the truth is that prudent collectors demand nice, original coins. Those examples that boast bold, original toning or superior strikes are experiencing intense demand. These are also the coins that can sell at very strong price levels, at auction or on the bourse. This selectivity has played an important role in the 2005 market with dealers leading the charge by posting exceptionally strong Bids for specific material. This kind of demand was seen at the May 24-25 auction in Atlanta held by American Numismatic Rarities, where more than **$3.2 million** changed hands. The sale featured the J. B. Worthington Collection and some of the many highlights are listed herein. Dealers will have no time to rest because the Stack's John J. Ford, Jr., Collection Part X sale is also taking place in Atlanta May 26. Dealers will be aggressively searching the bourse floor at the Whitman Coin and Collectibles Expo in hopes of landing some want list coins for their customers in addition to enhancing their inventory to be displayed in Long Beach, California. The June 2-4 Long Beach Expo follows the Atlanta show with an interim stop, May 29-June 1 in Beverly Hills for the two Pre-Long Beach sales. Superior Galleries and Goldberg's Coin & Collectibles will host these two auctions. The number of sales and shows over this two week period requires dealers to have a great deal of stamina and patience. They will also need a sufficient amount of available funds so they can compete successfully. Therefore they will have to pace themselves in order to maximize profits while keeping an eye on cash-flow, inventory and auction results.

Many dealers are constantly updating their sight-unseen Bids on the electronic dealer trading networks. However, as expected, the busy period just prior to and during major shows and auctions can result in the need for discounting as we see happening in a number of areas. Several dealers will also lower or remove their Bids during this time so they don't find themselves suddenly being over extended financially and miss that potential deal. You may expect common dates to suffer, and similar to last week that's what is occurring with Morgan and Peace Dollars. Among Morgans we see that some generic MS64 and MS65 examples are lower, now Bid $42 and $108 respectively. Generic Peace Dollars declined as well in MS63 thru MS65 along with additional softness found among examples in the $200-$600 price range. Silver Commems held firm as buyers look to selectively add to their positions. The 1920 Pilgrim advanced more than six percent this week in MS64. A few Gold Commemoratives dropped in the lower Mint State grades of MS61 and MS62. Type is one of the brighter spots within the sight-unseen market. Mint State, Proof and Proof Gold Type are all firm with some issues even enjoying increases. However, it is a different story when it comes to Gold Type. Lately, Spot Gold has been slightly up and down without any clear direction, trading under $420 per ounce. Consequently this softness appears with minus signs being displayed among several Gold Type denominations. MS65 Type III $20 Libs are suffering the biggest declines, down nearly 30% since January 2005. On balance, Buffalo Nickels, Mercury Dimes and Walking Liberty Half Dollars are steady.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or warranty that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

July 21-24, 2005 Santa Clara Expo

Held one week prior to the American Numismatic Association Convention in San Francisco, CA

Highlights of the show include:

- We are proud to announce that the July Santa Clara Coin, Stamp & Collectibles Expo will occur in conjunction with the American Stamp Dealers Association Summer Postage Stamp Show. The Santa Clara Expo will remain in the Santa Clara Convention Halls C&D, the ASDA show will be held in adjacent Hall B. Although the shows will run independent of eachother, the arrangement will draw many more dealers and attendees alike. Please visit www.asdaonline.com for additional information regarding the ASDA Summer Postage Stamp Show.

- The American Numismatic Association will hold a booth at the Santa Clara Expo where they will be giving out pre-registration packets for the ANA Convention.

- Superior Galleries of Beverly Hills, CA will hold their Elite Coin Auction selling millions of dollars worth of coins. Many dealers and attendees are drawn in by the auction, which never fails to be a success for Superior Galleries and for the Santa Clara Show.

- Numismatic Guaranty Corporation is an official sponsor of the show and will conduct onsite grading. NGC's prestigious reputation of being the leader in third party grading services and the official grading service of the Professional Numismatists Guild and American Numismatic Association will greatly increase dealer attendance.

- eBay is an official sponsor of the show. eBay will conduct educational seminars given by Troy Thoreson on "Buying and Selling on eBay." These free educational seminars offered by eBay draw in many attendees eager to learn about eBay.

- We now have the participation of three independent Grading Services - NGC, PCGS and ANACS. Their reputations and commitment to high standards of grading precede them.

- Unites States Postal Service Santa Clara Office holds a booth at the show offering new commemorative stamps and other products sought after by the dealers and attendees alike.

- Amos Press Coin World print 15,000 programs for the Santa Clara Show. Approximately 7,000 programs are inserted into Coin World Newspaper and Linn's Stamp News periodicals which are then distributed to all subscribers in the western United States.

- Heritage Auction, the official auctioneer of the ANA convention will have ANA lot viewing at the Santa Clara Expo. Also, both Bowers & Merena and American Numismatic Rarities will be showing pre-ANA auction lots. The Goldberg's will be showing a selection of lots for their September pre-Long Beach auction.

- Cupertino Coin Club is an official sponsor of the show and organizes all education exhibits. With the assistance of The San Jose Coin Club and Darrell Crane, President of the Full Step Nickel Club, the Cupertino Coin Club has transformed the Kid's Treasure Hunt into a huge success.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the **Sight-Unseen** certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XX No. 22 June 3, 2005 Single copy price $4.00

Record $4.15 Million Paid For 1913 Liberty Nickel Pair Of Pre-Long Beach Auctions Total $14 Million

June is underway with selective Bidding very much in evidence. This also appeared to be the tone, at least at the outset, for the activity taking place at the Long Beach Expo. Dealers got an early jump, even before set-up day by transacting business in their hotel rooms. One dealer said that he sold over $300,000 in coins to another dealer from his room. The deal included both Mint State and Proof Type. Lots of generic Gold and dated $20 Saint-Gaudens changed hands as well. Of course, the generic Gold sold at current (lower) levels. These prices have come down in recent weeks and the new lower prices are attracting quite a number of buyers. However, the dated Saints and Type are a different story. Those coins that have strong eye appeal and some rarity are bringing exceptional prices. We hear that 10-40 percent premiums are being paid for this material. For example, a PCGS VG-8 1793 Chain AMERICA Flowing Hair Cent sold, as part of that $300,000 deal for $9,850. Some additional Type readily selling include: Shield Nickels, Liberty Seated Dimes and Liberty Seated Quarters. Dealer set-up day was busy but not nearly as hot as things were only a few months ago. Still much business was taking place on the bourse. One dealer said that he sold $100,000 in Silver Commemoratives and Type to another dealer. This deal had a number of high-end Commems grading MS66 thru MS68. It also included some PR67 and PR68 Barber Half Dollars. These trades only seem to confirm what dealers are saying about the market and show in Long Beach. Dealers recognize the lower levels for generic Gold and Dollars. However, they are also quick to point out that there are many buyers for this material at these prices. More importantly, they believe that most other areas of the market are doing rather fine. Key dates and better date coins of all denominations are readily changing hands with strong prices being paid.

The first official day of the Expo also brought some major news. A new record price, $4.15 million, has been paid for the finest known 1913 Liberty Head Nickel. In a June 2 announcement at the Expo, the Eliasberg/Lee specimen, a PCGS PR66 changed ownership from Ed Lee, President of Lee Certified Coins to Legend Numismatics. The sale was brokered by John Albanese. Lee purchased the coin in July 2003 for nearly $3 million. Ironically, this sale comes at a time when dealers are saying that high priced coins over $10,000 are somewhat sluggish.

The sight-unseen market is reflecting similar observations of dealers on the bourse at the Expo. As we have previously mentioned, generic Gold is lower. This decline is just a continuation of what we have seen over the past few weeks. Lackluster Gold Spot has received much of the blame but things may be improving. As of this writing Gold closed over $420 per ounce, a move that may have been inspired by the recent rise in Silver, now at $7.53 per ounce. Gold Commems in low Mint State grades are displaying some weakness while their Silver counterparts are holding firmly at current sight-unseen levels. Morgan Dollars are quiet this week with dealers having some trouble finding generic examples in quantity at the new levels. Key dates are maintaining their appeal in all series. The Type markets are generally quiet as is the balance of the sight-unseen market.

The two Pre-Long Beach Auctions, May 29- June 1, by Superior Galleries and Ira & Larry Goldberg Coins and Collectibles realized $5.3 million and $8.7 million respectively. We have listed some of the many highlights from these sales.

Good for coins.
Good for numismatics.
Good for value.

Conservation. A good idea!

Professional conservation can make a world of difference for many coins. The key is knowing when and how to conserve a coin in order to maintain its beauty and value. At NCS, our evaluation team can virtually "see" what a conserved coin will look like before the process begins.

Our evaluation experts are the most experienced of numismatic professionals. These experts examine every coin submitted to determine what conservation procedure, if any, should be undertaken. Then our industry-leading conservation professionals apply their extensive knowledge, experience and advanced conservation techniques to recapture the original beauty of your coins and stabilize the surfaces to limit future deterioration.

This is why the American Numismatic Association turns to NCS for all of its conservation needs. This is also why, in a relatively short period of time, your fellow dealers and collectors have entrusted NCS to conserve millions of dollars worth of the hobby's finest coins, tokens and medals.

For more information on numismatic conservation and to view before and after photographs, visit our Web site at www.NCScoin.com.

July 21-24, 2005 Santa Clara Expo

Held one week prior to the American Numismatic Association Convention in San Francisco, CA

Highlights of the show include:

- We are proud to announce that the July Santa Clara Coin, Stamp & Collectibles Expo will occur in conjunction with the American Stamp Dealers Association Summer Postage Stamp Show. The Santa Clara Expo will remain in the Santa Clara Convention Halls C&D, the ASDA show will be held in adjacent Hall B. Although the shows will run independent of eachother, the arrangement will draw many more dealers and attendees alike. Please visit www.asdaonline.com for additional information regarding the ASDA Summer Postage Stamp Show.

- The American Numismatic Association will hold a booth at the Santa Clara Expo where they will be giving out pre-registration packets for the ANA Convention.

- Superior Galleries of Beverly Hills, CA will hold their Elite Coin Auction selling millions of dollars worth of coins. Many dealers and attendees are drawn in by the auction, which never fails to be a success for Superior Galleries and for the Santa Clara Show.

- Numismatic Guaranty Corporation is an official sponsor of the show and will conduct onsite grading. NGC's prestigious reputation of being the leader in third party grading services and the official grading service of the Professional Numismatists Guild and American Numismatic Association will greatly increase dealer attendance.

- eBay is an official sponsor of the show. eBay will conduct educational seminars given by Troy Thoreson on "Buying and Selling on eBay." These free educational seminars offered by eBay draw in many attendees eager to learn about eBay.

- We now have the participation of three independent Grading Services - NGC, PCGS and ANACS. Their reputations and commitment to high standards of grading precede them.

- Unites States Postal Service Santa Clara Office holds a booth at the show offering new commemorative stamps and other products sought after by the dealers and attendees alike.

- Amos Press Coin World print 15,000 programs for the Santa Clara Show. Approximately 7,000 programs are inserted into Coin World Newspaper and Linn's Stamp News periodicals which are then distributed to all subscribers in the western United States.

- Heritage Auction, the official auctioneer of the ANA convention will have ANA lot viewing at the Santa Clara Expo. Also, both Bowers & Merena and American Numismatic Rarities will be showing pre ANA auction lots. The Goldberg's will be showing a selection of lots for their September pre Long Beach auction.

- Cupertino Coin Club is an official sponsor of the show and organizes all education exhibits. With the assistance of The San Jose Coin Club and Darrell Crane, President of the Full Step Nickel Club the Cupertino Coin Club has transformed the Kid's Treasure Hunt into a huge success.

Sight-Unseen Market Weakens $1.65 Million Tendered For 1927-D Saint-Gaudens

The sight-unseen market weakened again this week with discounting becoming more evident in several areas. This is the third consecutive week where declines have outpaced the number of plus signs. Is the market reversing direction or just maintaining its selectivity? Understandably we see some declines among MS67 Silver Commems and select Gold Commems. Yet, the Isabella Quarter is hot with a slew of higher sight-unseen Bids in place. Mint State Gold Type is also tilting to the down side except for $3 Princesses which remain in serious demand. Proof Indian Gold is solid with several plus signs evident. The $2½, $5 and $10 Indians as well as the $20 Saint-Gaudens are all advancing in PR65 and better. Demand is also powerfully strong for early $5 and $10 Gold from 1795-1838. These high priced rarities are hardly available as a single piece let alone in quantity and so it is easy to see why strong prices can emerge. Remember that thin markets can be extremely volatile. Still, the best way to get a picture of this week's **mixed** market is to examine the Buffalo Nickel and Walking Liberty Half Dollar columns. Selectivity rules once again with lower Asking prices and higher Bids occurring simultaneously. Early Walkers remain in demand, especially for dates in the 1930s in grades MS65 and MS66. Buyers believe that these dates at these levels represent good value as most of them are available for below $1,500 and well within the range of most collectors. However some declines are occurring as well, primarily in the later dates. There is also some discounting found among Proof Halves, both Walker and Franklin. Bids for Buffalo Nickels are higher for several late dates in MS65 and MS66 while others are showing big percentage declines. Key dates remain as one of the brighter spots in the market, just look at 1914-D Lincoln Cents. Dealers tell us that many of their customers are continually trying to buy them and in some cases they will take multiples. Several numismatists have said as Dollars go, so goes the market. Well, the jury is still out but plus signs are sure becoming sparse. Generic and some slightly better date Morgan and Peace Dollars are on the soft side. Better dates are still finding many buyers. High grade Proof and Mint State Type are facing similar downward pressure. Opportunities do exist, even in a softer market for those dealers willing to keep on top of things. In the past week hundreds of coins have sold at public auction for far **below** their sight-unseen Bids. See the chart below for a list of some examples. Taking advantage of these opportunities can go a long way to improving one's cash flow and profits.

Is the bull market still in charge? Dealers at Long Beach were a bit confused. It was case where nobody was exactly sure which way the market was headed. A few dumped some coins on the market on one day only to turnaround and buy them back on the next. However, this indifference is not conducive to a smooth sailing coin market. Yet we know that even bull markets are capable of experiencing some bumps along the way.

Nevertheless, June has already been full of surprises and we're only one third of the way through it. Big ticket items are selling as if they're commonplace. There's no doubt that classic rarities are trading with greater frequency today. First there was the record $4.15 Million tendered for the finest known 1913 Liberty Head Nickel, a PCGS PR66 example, that provided a boost to the market just when it needed it the most. Next, at public auction a Branch Mint PCGS PR64 1838-O Capped Bust Half Dollar sold for $632,500. Now, we learn that another major rarity transacted during the June 2-4 Long Beach Expo, this one via private treaty. A PCGS MS66 1927-D $20 Saint-Gaudens was sold by Rare Coin Wholesalers, Dana Point, CA to Legend Numismatics, Lincroft, NJ for $1.65 Million. This coin is now heading to a dedicated collector assembling a **Superb** set of Saints. Are these blockbuster trades the sign of a nervous market or do they just represent the changing of the numismatic guard for some of the hobbies ultra rarities?

Next up is the MidAmerica Coin Expo June 23-26 in Rosemont, IL. American Numismatic Rarities will host an auction June 23-24 featuring The Drew St. John Sale.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

UNPRECEDENTED SEVEN-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the revised fourth edition of *The Coin Collector's Survival Manual®*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- **How to determine what a coin is worth and what grade the leading certification services would assign to it**
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer
- **How not to get ripped off if you buy coins through the mail or over the Internet — courageous information**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- **A comparison of PCGS versus NGC — which service does the market really favor?**
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

SPECIAL SECTIONS ON:

- **Doctored coins, how to detect them, and the case of the doctored hoard of gold rarities that got slabbed**
- The real truth about slab services "fixed grading standard" claims and premium quality coins
- Revelations from a leading coin trader
- **A grading service founder's startling admission of modified grading standards**
- The newest tax laws

CONTAINS ALL-NEW INFORMATION ON:

- **Gold coins as an economic safe haven**
- Coin conservation services
- **Coin insurance and safekeeping in light of September 11, 2001**
- The latest Internet strategies
- **Digital photography pointers**

and much, much more!

To be
TOP DOG...

... you need a perfect pedigree

Keith Love
ICG's Senior Grader

Keith has been in the rare coin business for more than 20 years as a top wholesaler, PCGS grader, and finally ICG's founder and CEO. Keith co-created and has taught the ANA Advanced Coin Grading class for more than five years. The ANA calls Keith "A renowned expert."

Walt Armitage
ICG's Senior Grader

Walt began his coin career more than 25 years ago. In addition to operating his own successful rare coin business, Walt has spent ten years grading at ICG and PCGS and set up the World Coin Grading program at both services. An ICG founder, Walt is one of the most respected numismatists in the world.

Sue Berg
ICG Grader

Sue has been in the rare coin business for six years. Her discerning "eye" and work ethic has made her an important part of the best team of graders in the rare coin industry.

J. P. Martin
ICG's Senior Numismatist

J.P. has been involved in the coin industry for more than 25 years. He worked at the ANA as a grader, authenticator and numismatist for almost 15 years. J.P. has written two ANA correspondence courses on grading and authenticating, starred in the ANA educational videos on grading and authenticating, and taught counterfeit detection to a number of Secret Service agents. J.P. is a rare coin genius.

Larry Wilson
ICG Grader

Larry has more than 30 years experience in the rare coin industry. Working with Keith Love as a rare coin wholesaler, Larry has become one of the most educated numismatists in the country. Specializing in U.S. Type and Gold, Larry has served as a mentor to many of today's successful rare coin dealers.

Franklin Half Dollars Score Heavy Gains New York Auction Realizes $3 Million

While minus signs are still prevalent, we do see some support coming back in several areas. Many of the market segments are experiencing both strength and weakness. This is in keeping with a very selective rare coin market. However, continued pressure is found among generic issues as buyers are only willing to pay at or near current levels for them. The days where a large number of orders for these coins coming from promoters are practically gone. With that said, just take a look at the explosion of strong Bids seen landing on numerous Franklin Half Dollars. Leading the pack we find the 1956, 1957 and 1958, each posting an impressive gain of some 80% in MS67FBL for both PCGS and NGC examples. This volatility can spell opportunity for some prudent traders as we see several instances where Franklin Halves traded at public auction for prices far below current sight-unseen Bid. A PCGS MS66 1953 Franklin sold at auction for only $103 this past week when buyers are paying $260 sight-unseen. This is just one example from a dozen that sold below Bid at auction in the last seven days. The popular Morgan Dollar series is rather quiet overall except for solid strength for the semi-key 1887/6. Sight-unseen Bid for this particular date jumped as much as 67 percent for MS61 and MS62 examples. Yet, declines are also occurring, mostly for Morgans priced under $500. Other better dates are needed but Bidders are not willing to increase their sight-unseen offers at this time. Proof Singles are soft especially the Red Lincoln Cents from 1938-40. Silver and Gold Commems are mainly holding at current levels with only a few declines noted. Mint State and Proof Type are virtually unchanged. Still, Type examples are absolutely necessary to keep one's inventory looking good. Gold Type is still rather quiet as is most of the market. However, this situation can change quickly if Gold Spot heads north.

Last week we questioned whether or not the bull market was still in charge. Some are of the opinion that the coin market may simply be going through a phase where it needs to just stop and take a breather. Most dealers agree that the market is perhaps "a little more selective" this year. The powerful demand that characterized the market in 2004 and early in 2005 has given way to one that is operating more carefully and prudently. For example even the registry craze has cooled a little bit. This is not to say that collectors are no longer working at building finest known sets. No, it's just that they are not as willing to "exuberantly" Bid, for example, for MS68 Philadelphia Mercury Dimes to unbelievable levels. Still, the key date mania lives on as collectors desperately seek these coins for their rarity and desirability. One dealer believes that the more common coins are trading approximately 10 percent lower than they were earlier in the year. He is not alone because many have seen "stuff" like generic Gold and Morgan Dollars selling at reduced prices. However, many still believe that the state of the over all market is generally alive and well and certainly healthy. Retail sales have been strong in June for many that sport a well rounded and nice inventory. Of course collectors are mainly looking to buy specific dates and Types for their collections but that is the essence of today's market. Coins including: Better date Morgans; nice Mint State and Proof Type; early Type; and key dates of most series are eagerly and avidly sought. Want lists contain many of these issues and continue to go unfulfilled week after week. Dealers that are quick to recognize where the demand is targeting stand a better chance of surviving in this numismatic atmosphere. Those that are not able to maintain the fast pace can quickly be left out in the cold.

Stack's conducted an auction June 13-14 in New York. The sale realized nearly $3 million. We have listed a few of the certified highlights.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

$3 Gold Sizzling As Summer Begins
Early Gold Offered In New York Sale

The rare coin market appears to be cooling down a little in contrast to the summer heat. This weakness has become increasingly evident throughout the last several weeks. It is a case where the aggressive widespread Bidding that defined the sight-unseen market earlier in the year is just not to be found today. A healthy number of Bids remain in place at current levels but the intensity and number of dealers attempting to out-Bid each other has certainly dwindled. Maybe this lull is just what's needed as dealers choose to sit on the side lines while reevaluating their next moves. It is also time when many are in Rosemont, Illinois participating in the Mid-America Expo. The Drew St. John sale by American Numismatic Rarities in Rosemont should also be viewed as a welcome event for those still searching for rarities. This June 23-26 show usually receives high praise because many serious collectors are able to attend due to its proximity to the rich, healthy east coast and mid-western collector base. Several dealers are at the show with the sole intention of buying coins for their customers. Searching table after table for nice material and coming away with a bargain is what it's all about. Want lists are out there with special needs still going unfulfilled. Often, the dates needed are those that are among the scarcest found for each particular series. Demand remains powerful for the Liberty Seated and Barber series because they contain many rarities and collectors want them. Maybe a few of these will turn up in Rosemont.

Next many enthusiasts will turn their focus towards New York City. There, Heritage will conduct the New York Signature Auction June 29-30. This sale includes the Empire State Collection Part Two and the Stig Ericsson Collection Part One. American Numismatic Rarities will also host an auction on June 30 in New York. It will feature The Gentleman's Collection of **early** U.S. Gold and the Cardinal Collection. Regular auctions, such as these sales, have helped to provide a steady source of rarities and better dates. This supply of coins fuels growth as long as the demand is able to absorb the material. So far it has managed to keep pace, but as we said earlier things appear to be slowing down. We see that some prices realized have been a bit off from the higher levels found earlier in the year.

A somewhat similar scenario is taking place in the sight-unseen market. Here, we find that Silver Commemoratives are very quiet this week. No one is jumping out and posting a host of strong, sight-unseen Bid increases that we became accustomed to in March and April. At the same time there is also not a lot of discounting occurring. So the status quo may just be a good thing right now. Gold Commems are nearly as quiet with only the 1917 McKinley Memorial Dollar being discounted in MS64. There's also not a whole lot happening with Morgan Dollars. Still, there are several dates suffering losses and a few even managing a plus. Generic Morgans are holding at current levels with some quantities in MS65 overhanging the market albeit looking for stronger money. Peace Dollars are finding renewed interest for MS63 generics for both NGC and PCGS. Bid is now at $22, up $1, for the common Philadelphia dates from 1922-1925. Type is almost a no-show this week. Both Mint State and Proof Type are displaying very little in the way of changes. Of course there are many dealers with Bids at or near current levels but no one seems willing to be more aggressive right now. Mercury Dimes are showing a slight spark with plus signs appearing for several dates in grades MS65FB and MS66FB. However this interest is just targeting those Bid below $400 with the majority under $100. Mint Gold Type is mixed. Spot has been inching higher climbing above $440 per ounce and that has benefited several bullion sensitive denominations. Gold Type is being led by the strong demand for $3 Gold that seems to continue unabated. This week they are up in MS61 thru MS63 for both NGC and PCGS. Since January 7, $3 Princesses have soared 40 percent in MS61 and MS62. They have also jumped better than 35 percent in MS63. Some discounting is evident among the Walkers and Proof Singles but none too serious. The market columns published on the fourth week of each month can often reveal the source of the declining issues including: lower trades, asking prices and auction results. A number of examples that continue to sell in auction for less than their sight-unseen Bids can also be identified with a quick perusal of the market columns.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (month old); "**t**" – Trade during the most recent month; "**lm**" – Lowest asking price appearing last month. "**lt**" Trade appearing last month; "**ot**" Trade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis

Sight-Unseen Market Sluggish As July Begins Auctions Attract Buyers In New York

It may be July, but many dealers are having a difficult time trying to plan much needed vacations. This is because there has been virtually no let-up in the show circuit as one show and auction concludes only to have another follow. The number of shows, auctions and private trade-n-grade events have increased in the past few years requiring dealers to have a lot of dedication and patience to stay on top of things. Many are willing to put in the time, not to mention the cost to attend these numismatic events for several reasons including not missing out on that special deal, or finding those long over due want list coins. A collector will often buy a needed date from the first person offering it for sale. So even though customer want lists may appear to mean a future sale is imminent, one can't become too complacent. It takes many hours of work when participating in a public auction but often, that's what it takes to be successful in today's fast-paced market. Collector demand continues to support current levels and as long as the buyers are out there shows and auctions will remain necessary. That was the belief of several in attendance at Rosemont, Illinois for the Mid-America Expo. Many were scouring the bourse trying to fill some of their client's needs and also trying to buy some nice coins for their still depleted inventory. Consequently coins were changing hands on the bourse because aggressive Bidders aren't shy when it comes to buying that **special** coin they need. That same scenario is being repeated, this time at the June 29-30 Invitational in New York City.

The sight-unseen market is a bit soft right now, especially with generics but the rarities are still heavily sought-after. The competition for better dates has maintained it's strong base of support throughout much of the year. Still as we alluded to last week, there are signs that the sight-unseen market may be slowing down. Bidders are backing away from their aggressive activity that defined their actions earlier in the year. Walking Liberty Half Dollars, Morgan Dollars and Gold Type have dominated the sight-unseen trading for the last 10 days of June on the electronic dealer trading networks. Yet most of the coins involved were relatively common with nothing really outstanding to report. Discounting is still prevalent and plenty of coins are still selling at auction for prices well below posted sight-unseen Bids. Those willing to pay careful attention to current sight-unseen Bids stand to gain the most from this opportunity. Silver and Gold Commemoratives are rather quiet having lost quite a bit of their supporting sight-unseen Bids. Cleveland and Elgin Half Dollars are two examples that have weakened slightly in several grades. Morgan Dollars are displaying softness for generic issues grading MS63 thru MS65. A lack of orders and demand for them is contributing to the decline. Also select mid-range priced San Francisco and Carson City Mint Morgans drifted lower including: 1885-S in MS65, 1883-CC in MS66 and the GSA 1891-CC. Mint State, Proof and Gold Type all held virtually steady except for Type 2 Standing Liberty Quarters in 63FH, which are now lower. Mint Gold Type is stable with buyers still trying to make sense of what's happening in the bullion arena as Gold flirts with $440. $3 Indians are even silent after their strong showing in June. Mercury Dimes and Walking Liberty Halves served up a few minus signs this week. Check out the over ten percent Mercury Dime declines for the 1941-S in PCGS MS67FB and the 1943 in NGC MS67. A half dozen Denver Mint Walkers are down as well with the PCGS 1943-D in MS65 sustaining the single largest drop at nearly 17 percent to $158.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

CERTIFIED COIN DEALER newsletter

ICG Certifies 1974 Aluminum Cent

The rare coin market was able to match the fireworks of July 4 a few days early with the American Numismatic Rarities June 30 auction sale of two coins climbing above the $1 million plateau in New York City. Last week we wrote that aggressive Bidders aren't shy when it comes to buying "special coins." This trend is certainly continuing. The Flowing Hair and Draped Bust Silver Dollar Cardinal Collection, and a Gentleman's (Early U.S. Gold) Collection of 75 lots combined for $8.4 million. The featured 1794 Flowing Hair Dollar graded NGC MS64 claimed $1.15 million. A few dealers even thought that this price realized was on the low side considering the importance and rarity of this initial Silver Dollar. They came to this conclusion after making the comparison among other recently hammered million dollar plus rarities sold at auction such as the 1913 Liberty Head Nickel and 1894-S Barber Dime. Another rarity surpassing the $1 million threshold was a PCGS MS65 1796 $2.50 Capped Bust, No Stars example grabbing $1.38 million June 30. This is a much sought-after jewel by serious Type collectors as well as the few that are building early $2.50 Gold sets by date and variety.

Overall the sight-unseen Bidding has diminished while a few are selectively chasing some examples here and there. The decrease may be because dealers are currently preoccupied with shows and auctions as well as their customers' want lists at this time of year instead. Additionally as their liquidity needs expand, they tend to pull back some of their sight-unseen Bids. Discounting is another consequence. Albeit the opportunity benefits are availed for those who pay attention and act. However it is the Type collectors that are supplying a lot of the interest in the coin market today. This has certainly been true of the entire **early** Gold segment. However, we also continue to monitor the popularity and demand for **early** Copper and Silver Type. This area is growing and we understand that aggressive, knowledgeable collectors are still setting aside ample funds for this material. It appears that select Type may have replaced Morgan Dollars, Silver Commems and Gold Type for top honors. Yet it is also important to remember that the selective and fluid nature of demand makes these assumptions tentative at best. Still, Gold Type has cooled a bit following Spot's decline to the lower $420s since the $440 per ounce level was reached. Also another week goes by where Morgan Dollars aren't receiving the strong, sight-unseen Bids that characterized the activity earlier in the year. Walker interest is rising. Walking Liberty Halves are active with plus signs appearing for dates in the mid 1930s graded MS65 and MS66 by PCGS.

ICG announced that they are the first to professionally authenticate, grade and encapsulate a 1974 Aluminum Lincoln Cent. This piece is owned by the family of Officer Albert Toven and has been graded as an AU58 Lincoln Cent Struck on an Experimental Aluminum Blank. These trial pieces dated 1974 were actually struck in 1973. Most of the 1.5 million trials struck by the Mint were melted, however one is housed in the Smithsonian's National Numismatic Collection. Remember that Lincoln Cents of the early 1970s were 95 percent Copper. So these Aluminum trials were struck as a possible solution to the higher production costs caused by quickly rising Copper prices.

Meanwhile dealers are preparing for two major summer shows. Santa Clara is up next with many heading to California to attend the July 21-24 Expo. Superior Galleries will host the Santa Clara Elite Coin Auction July 22-23. Next, the San Francisco Pre ANA auctions will begin with Bowers and Merena conducting the July 2005 San Francisco Rarities Sale on July 24. American Numismatic Rarities will follow on July 25 with the sale of the William H. LaBelle, Sr., Collection. We have listed a few of the many highlights from each of these auctions. These events may be considered a tune-up for the major gala that is the American Numismatic Association's annual summer convention in San Francisco July 27-31.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

PROOFLIKE MORGAN DOLLARS

P.L. Dollars may be semi-reflective, with less reflectivity than the deep mirror Prooflikes. Bids for P.L.s are usually much lower than for DMPL's, but command some premium over non-P.L. strikes.

$3 Princesses Back In The Plus Column
Fresh Material Expected To Appear In Santa Clara

The summer activities are in full swing and dealers are trying to find the extra stamina it takes to survive this busy period. For them, the market is doing just fine and their expectations for the Santa Clara Expo are bullish. Generally pre-ANA shows, such as this year's Santa Clara, are usually pretty good. That's because a lot of dealers are expected to attend since the ANA follows a week later in nearby San Francisco. Also, many that go to the ANA tend to bring a lot of the "good stuff" with them. Some of the goods include coins from old-time collections that have recently been purchased over-the-counter. Many dealers will hold on to this material and wait to offer it at ANA shows, especially summer ANAs. This strategy allows many more potential buyers to see one's inventory as ANAs and Pre-ANAs are some of the best attended shows. More importantly for dealers attending the Expo and ANA is getting there early for first crack at the "fresh" material. We expect that a lot of business will have already been transacted before the ANA officially begins its first day. It's no wonder that dealers are expecting an active, brisk Santa Clara Expo July 21-24.

The *CCDN* Coin Market Index has not moved much, either up or down, since the beginning of May when it was 856.98 compared to the huge upward swing seen earlier in the year. As we approach major shows and auctions there is usually a slow down in trading activity as dealers evaluate their positions and formulate their strategies. Things are slightly different this time around as a few areas of the sight-unseen market are improving via higher Bids. A couple of Carson City Morgan Dollars are attracting a few increases. Next, check out the interest for the better date 1887/6 Morgan in MS63-MS65. Don't feel sorry for the lower Mint State grades because since January, MS61 and MS62 examples have increased 50 percent or more. Top honors, though, must go to the key 1894 that leaped by as much as 90 percent in 2005 for examples graded MS64. Morgan Dollars have been quite weak since late May but there appears to be some life returning. Unfortunately demand is not seen among generic Dollars. Common date Morgan and Peace Dollars still remain lackluster with Peace examples declining in grades MS64 and MS65. We see what may be the beginning of another round of higher Bids for $3 Gold. Bids are stronger for NGC and PCGS examples grading MS61 thru MS66. The largest percentage gains are occurring for grades MS65 and MS66, jumping 16 and 18 percent respectively this week. Otherwise Mint State Gold Type is relatively quiet especially since Gold Spot hasn't quite decided which way it's headed. Silver Commemoratives continue to be in a dry spell with plus signs still absent. Gold Commems are duplicating Silver's effort with a less than impressive showing of their own. Mint State and Proof Type are stable with just a few issues being discounted. This, probably, was necessary to improve someone's cash flow before working the bourse floor and/or auctions. Better date $20 Saint-Gaudens are fostering some demand but selectivity is still guiding this portion of the Gold market. A few Denver examples are making some nice moves this week including 1910-D and 1914-D. The common dates are languishing while being tied to Spot but the scarcer dates are still able to generate strong money when they do become available. Buffalo Nickels are stagnant but Mercury Dimes are finding strong Bidders for a couple of PCGS examples. The 1931-S is a desirable coin in MS66FB where we find a higher Bid at $2,560. The $1,500 sight-unseen Bid for a 1927 in MS67FB is even more impressive with a 15 percent jump over last week's $1,300 Bid. Both of these increases are refreshing because all year it has been the Denver issues, led by 1916-D, that have dominated as the top movers of this series. Walkers and Proof Singles are basically quiet with just a bit of discounting taking place.

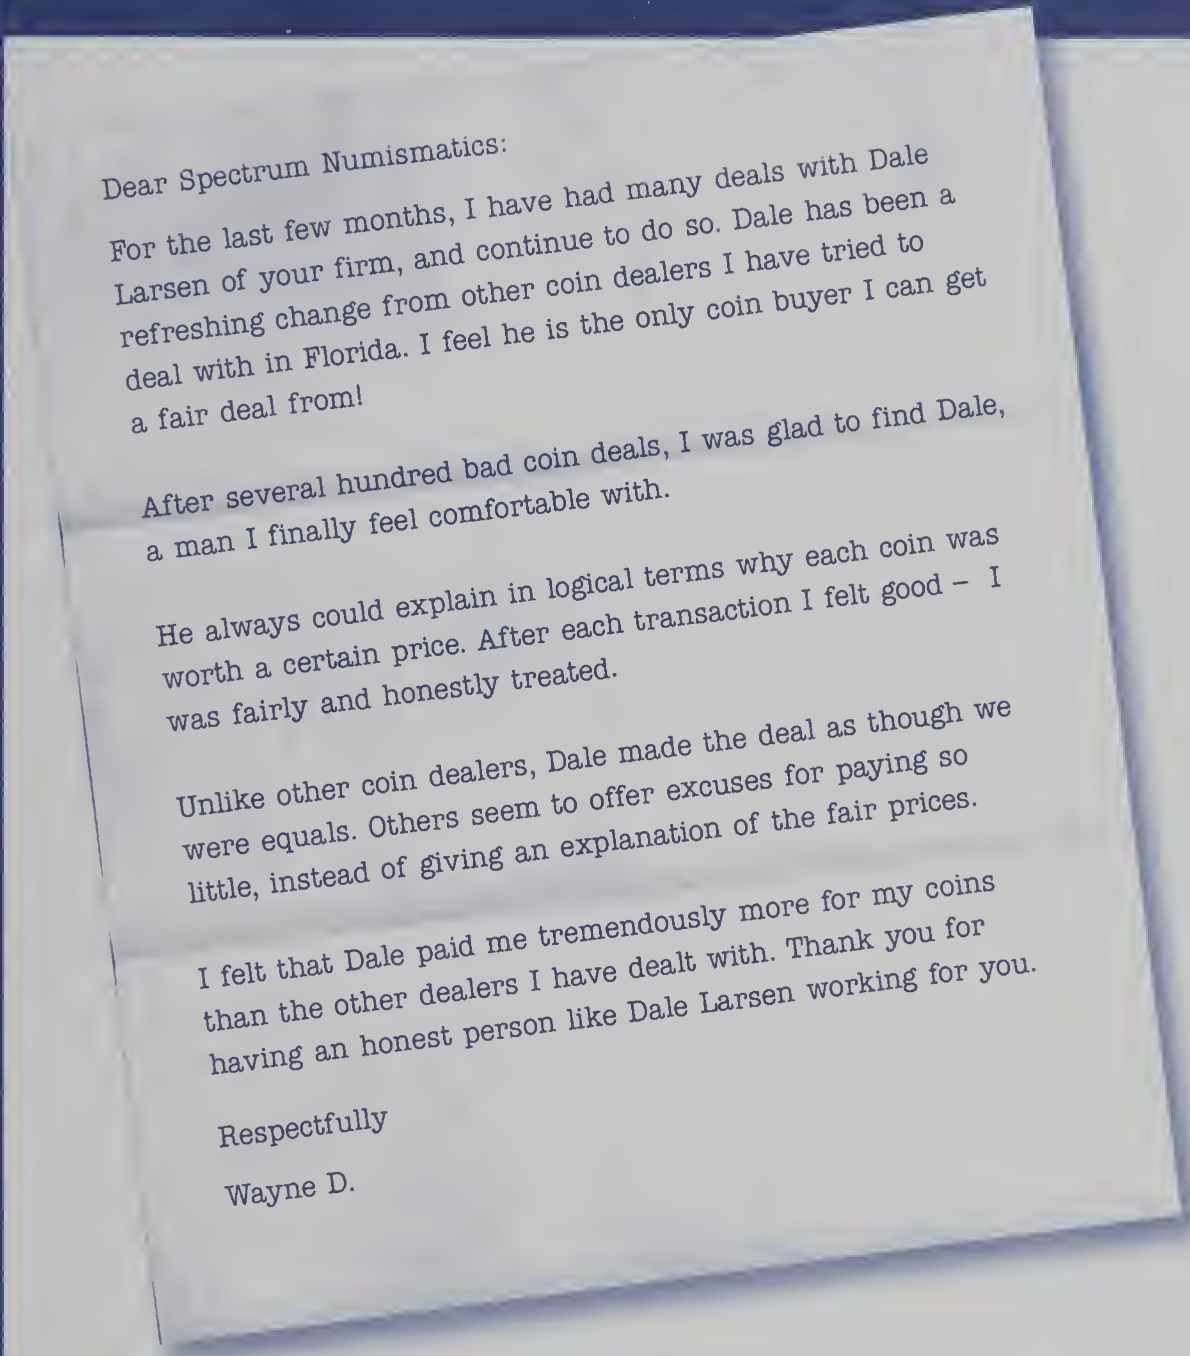
A Refreshing Change From Other Coin Dealers!

"Dale paid me tremendously more for my coins!"



Dear Spectrum Numismatics:

For the last few months, I have had many deals with Dale Larsen of your firm, and continue to do so. Dale has been a refreshing change from other coin dealers I have tried to deal with in Florida. I feel he is the only coin buyer I can get a fair deal from!

After several hundred bad coin deals, I was glad to find Dale, a man I finally feel comfortable with.

He always could explain in logical terms why each coin was worth a certain price. After each transaction I felt good – I was fairly and honestly treated.

Unlike other coin dealers, Dale made the deal as though we were equals. Others seem to offer excuses for paying so little, instead of giving an explanation of the fair prices.

I felt that Dale paid me tremendously more for my coins than the other dealers I have dealt with. Thank you for having an honest person like Dale Larsen working for you.

Respectfully

Wayne D.

Dale Larsen *is a coin collector turned rare coin dealer. "I've walked a lot of miles in the collector's shoes and I know how he or she likes to be treated," Larsen says. His specialty is coins with "great eye appeal" and he "loves dealing with the public."*

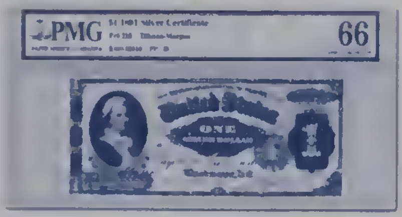
BUY, SELL & COLLECT
IN A WORLD THAT'S FAIR
AND JUST



Certification. Standardization. Protection.

Professional and impartial paper money grading and encapsulation gives you a collecting environment that is stable, liquid and free of fraud.

Paper Money Guaranty (PMG), the newest independent member of the Certified Collectibles Group (CCG), combines accurate, impartial and knowledgeable graders with proven processes and standards for the care and evaluation of your notes.

Many of these standards have been established for years at our independent affiliated company, Numismatic Guaranty Corporation (NGC), the largest, most respected company in the authentication and grading of rare coins. And, as with coins, each of our paper money experts is prohibited from buying and selling notes to ensure impartiality.

Most importantly, behind it all is the passion and respect for the hobby that we bring to work with us each and every day.

To learn more about PMG, contact your local dealer, or contact Glen Jorde, Grading Finalizer, at 877-PMG-5570.

Peace Dollars Stir In Sight-Unseen Market 1927-D Saint-Gaudens Surfaces In New York

The dog days of summer are here and for dealers it is a time to see if they have what it takes to survive the next few hectic weeks. The Santa Clara Expo is already underway, and with the American Numismatic Association's annual summer convention just a week away it is going to take a lot of endurance. Five public auctions within approximately one week of each other are scheduled to transpire. This means that 11,000 lots are ready to hit the auction block and it takes a lot of work for those participating in these sales. However, those that are willing to go that extra mile stand the best chance of coming home with a prize. Yes, the numismatic calendar is full as we traverse the last two weeks of July with auctions and shows dominating the landscape. Many that we speak with expect activity to increase culminating in a greater number of transactions and deals being consummated. Coins are often sold before the auctions and shows to generate ready cash and to blow out some material to make room for new purchases. Those buying coins are hoping for a fast turn over in Santa Clara and San Francisco for a quick profit.

Dated Saint collectors will be happy to know that one of the keys to the series has been discovered in high grade. An MS66 1927-D $20 Saint has been professionally graded and certified by NGC as the finest they've seen. This coin had not been seen by any grading service prior to this slabbing. This specimen was submitted by a west coast dealer attending the New York Invitational show. The finest known 1927-D, a PCGS MS67 specimen, is scheduled to hit the auction block later this year.

This week's sight-unseen trading appears to be on the light side. Sometimes the increase in activity in the sight-seen portion of the market is offset by a decrease in sight-unseen trading. Mint State Gold Type is lackluster with several denominations discounted. It's not too surprising because Spot has been soft and Gold is an easy way to raise cash for the upcoming events. Silver Commemoratives are still receiving supporting Bids but there doesn't seem to be anybody willing to push the Bid. Some issues have been discounted but that isn't unusual considering the auctions and shows on the horizon. For example, a gem PCGS MS65 Lexington declined 8.5 percent. We also see PCGS and NGC MS61 thru MS63 Cleveland Half Dollars dropping a bit. Finally, an NGC MS61 Isabella Quarter dropped 6.8 percent. Popular Commems are sold to raise some fast cash with the knowledge that they can be bought back easily and reasonably. Gold Commems are stable with no changes to report. Morgan Dollars have been on the soft side. Better dates are still in demand but the generic issues remain weak. Interest is sharply higher for Peace Dollars this week as Bidders target a number of slightly better dates. Since January the **1934** has risen a **whopping** 85% in PCGS MS63. Besides the 1934, increases are occurring for some select issues including: 1921, 1922-D&S, 1925-S, 1926-D&S, 1927-D, 1934-D and 1935. All of this adds up to a surge in demand, sight-unseen, for slightly better and mid-range Peace Dollars. Mint State and Proof Type are rather quiet this week. Still, many individuals are interested in buying Type coins and dealers are always on the look out for a good deal when it comes to Type. For example, check out the increase for Type 1 1913 Buffalo Nickels in PCGS MS65 and PCGS MS66. Yes, the increases are relatively small but this date is a must for Type collectors looking for a Type 1 Buffalo Nickel. Wow! A jump of 25 percent is posted for an NGC MS64FB 1936-D Mercury Dime, now Bid at $50 sight-unseen. An NGC MS66FB with the same date increased by 6 percent. A few Gem Denver Walking Liberty Half Dollars are suffering some discounting. Proof Singles have some minus signs as well. The declines are moderate with one Walking Liberty Half Dollar and two Jefferson Nickel Proofs participating.

Finally, ***the Coin Dealer newsletter family of publications*** is saddened to learn of the passing of A.M. "Art" Kagin on July 18. He meant a great deal to the hobby and will certainly be missed by everyone.

MARKET LISTINGS

MARKET columns reflect the latest dealer–to–dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, conventions and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales–related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *w*eek prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions. "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Active PNG Day Kicks Off ANA
Buffalo Nickels Decline

We have come to expect the sight-unseen market to soften when big shows and/or auctions take place. Well, the Santa Clara Expo followed immediately by the ANA's summer convention in San Francisco have certainly contributed to this week's declines. Keep in mind that over $20 million in rare coins have already sold at auction this week with still more to come. This scenario makes for a cash flow headache for dealers unless their credit is sufficient enough to fully meet their show and auction requirements. Many attend these major shows looking to buy and sell but often the emphasis is placed squarely on the buying side. Of course dealers look to restock their depleted inventory shelves, but they also hope to fill some of those lingering, tough want list demands for their good customers. So this means spending long hours viewing auction lots as well as reviewing a large number of double row boxes on the bourse. The ANA and its auctions are usually the forum that can supply select rarities and unusual varieties that have been difficult to locate. Naturally the Asking prices will undoubtedly be high but that is what's to be expected during a bull market. We have already learned that the July 26 PNG Day was "very active with a number of serious collectors buying and selling." One major dealer-to-collector transaction resulted in the sale of an NGC PR63 1838-O Capped Bust Half for $475,000. This example previously sold at the Pryor Collection sale in 1996 for $104,500 and is one of only eleven known to exist today.

As we already alluded, the sight-unseen market has weakened with minus signs outnumbering the plus signs twelve-to-one. Discounting seems to be pervasive with many areas of the market being hit. However, we don't believe that this is a reversal of the bullish momentum but we do acknowledge several areas that may have gotten a bit ahead of themselves. Silver Commemoratives are lower with discounting targeting a number of issues. Gold Commemoratives are virtually unchanged. Morgan Dollars are experiencing more declines as 22 different dates drop. We understand that the Morgan Dollars were trading a bit on the slow side even before the ANA and auctions arrived. Ample supplies of Morgans mean a few must go when funds are needed. Generics are still the weakest portion as most better dates remain solid. Gold Type is weak but much like the Morgan series this area of the market has also suffered in the weeks leading up to the ANA. It may be a case where a stalled bullion Spot and the need to sell Gold coins to add ready cash has served Type a double whammy at ANA time. This combination has forced even more minus signs. The MS63 grade is absorbing the bulk of the negatives as dealers know that Gold Type in this grade is easy enough to replace. Mint Type is holding up rather well with at least one buyer in need of quantities of With Cents Liberty Nickels graded MS64. Higher sight-unseen Bids ranging from $156 thru $2,500 have been placed for up to ten of every date. Less can be said about the Proof Type market as several minus signs are displayed among the higher graded examples. Buffalo Nickels are one of the hardest hit segments of the sight-unseen market. Several high grade examples in PCGS MS65 thru MS67 got clobbered at auction this week, declining by as much as 21%. See the list above for many examples that did not drop because higher sight-unseen Bids remain active. Just another example of money left on the table.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Sight-Unseen Market Slips

1854-S $2½ Liberty Surprises Numismatists In California

The market fell back a bit during the San Francisco American Numismatic Association's summer convention. It's not that a reversal is taking hold but rather just a hiccup in what still appears to be a continued bull market. Dealers were disappointed with their results during ANA week but nonetheless, they are still encouraged by the strong collector demand that is being maintained as we begin August. There are many more collectors out there working on building sets of one kind or another than just a few years ago. We also know that a reasonable percentage of them are sophisticated, well-heeled and knowledgeable individuals that have not soured on buying additional coins for their collections. Consequently the majority of the burden to find these rarities falls upon the dealer community. Many collectors rely on dealers for their experience and wisdom before a transaction is completed. Unfortunately select rarities may take quite a bit of time to find. Another problem may stem from the final cost of a particular rarity. Once available, usually at public auction, a Bidding war may ensue that leads to a record price. This is certainly not out of the realm of possibility for a bull market. So dealers need to discuss this scenario with their customers to make sure that they have the best chance of acquiring the coin when it finally does appear. One of those special coins to appear may include the elusive and desirable 1854-S Liberty Quarter Eagle. That's because the rarest of all the Quarter Eagles will hit the auction block on September 18th in Beverly Hills, California. It will be included with the C.L. Lee and Allison Park Collections offered by American Numismatic Rarities. This classic rarity is new to the numismatic world's census. It was brought into the ANA for consignment by a northern California family. First seen by numismatists a week earlier in Santa Clara, it had been a family heirloom since the late 1850s and is among the finest known. It has been graded EF45 by NGC and it is believed to be one of just 10-12 known survivors from an original mintage of only 246.

This week's sight-unseen market, much like last week, is serving up some more discounting. It is a time where selectivity is at the forefront of the decision making process of whether or not to buy or sell a specific issue. When prices move higher, as they normally do in a bull market, prudent decisions need to be made. Keeping an inventory fresh and stocked with the coins that are in demand becomes very important. Since this market is ever changing, dealers must be able to keep pace with those changes to maximize his or her profits. One could also improve their bottom line by keeping abreast of current Bids. Unfortunately, we continue to see coins sell at auction for well below current sight-unseen levels. The opportunity to capitalize on this discrepancy may be available for those who can afford to put forth a little extra effort.

Silver Commems are generally lower this week with several issues declining. Notice the Lafayette Dollar in NGC MS61 dropping more than 14 percent. Morgan Dollars are also weak with many, mostly common issues, displaying minus signs. Select Mint State and Proof Type examples are lower with Matte Proof Lincoln Cents bucking the trend with some higher sight-unseen Bids being recorded. Gold Type is experiencing discounting as well, even in spite of a higher Spot. Now threatening to break $440 per ounce, this could provide a boost to a bull market looking for its second wind. Buffalo Nickels are following last week's declines with another round. Some dealers are making the most of the opportunity by buying some at these more attractive levels. A few of this week's bright spots are found within the Mercury Dime series. Check out the 1945 in PCGS MS65FB Bid at $6,350, more than 18 percent higher than last week. Walkers and Proof Singles are again seeing some discounting as transactions finalize below current sight-unseen Bid. The middle and late dates are weak while early Walkers remain firm with Bidders supporting current levels. Several Proof Walkers led the way down for Proof Singles with many examples being hammered below sight-unseen Bids.

UNPRECEDENTED SEVEN-TIME NUMISMATIC LITERARY GUILD AWARD WINNER

Traditionally, learning a lesson in the rare coin market has been very expensive. You would buy a coin for $500, find out later that it was worth only $50, and, thus, you would have to pay $450 to learn just one lesson. But now, thanks to the revised fourth edition of *The Coin Collector's Survival Manual®*, by Scott A. Travers, you no longer have to pay a fortune to learn about how to buy and sell coins profitably.

This thoroughly revised edition examines the coin field from an insider's perspective and continues to break new ground in revealing the ins and outs of coin collecting and investing. Excellent photographs and detailed charts amplify the encyclopedic, clearly written, meticulously organized text. You'll learn about the following:

- How to look at coins the way the professionals do
- **How to determine what a coin is worth and what grade the leading certification services would assign to it**
- How to spot slight friction on otherwise "Gem" coins
- How to tell the difference between proof and prooflike
- **How lighting affects appearance—and the latest in halogen flashlights**
- Altered and counterfeit detection techniques
- How to judge price guide accuracy
- Selecting and testing a coin dealer
- **How not to get ripped off if you buy coins through the mail or over the Internet — courageous information**
- Profitable - and not-so-profitable - liquidation techniques
- **How to buy and sell at conventions like the pros do**
- How to spot a cleaned and artificially toned coin
- **A comparison of PCGS versus NGC — which service does the market really favor?**
- Stunning exposé and bombshell interview on coin "doctoring"
- **Special full-color section on artificially toned and doctored coins**

SPECIAL SECTIONS ON:

- **Doctored coins, how to detect them, and the case of the doctored hoard of gold rarities that got slabbed**
- The real truth about slab services "fixed grading standard" claims and premium quality coins
- Revelations from a leading coin trader
- **A grading service founder's startling admission of modified grading standards**
- The newest tax laws

CONTAINS ALL-NEW INFORMATION ON:

- **Gold coins as an economic safe haven**
- Coin conservation services
- **Coin insurance and safekeeping in light of September 11, 2001**
- The latest Internet strategies
- **Digital photography pointers**

and much, much more!

U.S. Mint Recovers 1933 Double Eagles Morgan Dollars Mixed

Last week we alluded to a market that failed to meet its expectations in San Francisco. Most of the dealers on the bourse believed that part of the reason for the weak attendance has to do with the show's location. Understandably there are better places to hold a major rare coin show but we also know that the market has been pushing higher for quite some time and just needed an excuse to pause. Still, the coin market seems to be very resilient as we plow through August. The strong need for "nice, fresh coins" was often heard on the ANA bourse and it continues today. Obviously those dealers that sport an inventory with some of these coins are clearly having superior shows. Buyers of this type of material can be easily found all over the country and this surely has a way of driving-up the final sales price. Now, dealers are in Baltimore hoping to fulfill some of those same needs that escaped them in San Francisco. Expectations are running high because of the solid collector base in Baltimore and its surrounding area. Attendance is usually strong and retail buying is expected to beat San Francisco's poor showing. However, wholesale trading may not be as strong because successive west coast shows may make it impossible for there to be enough new material.

Speaking of *new material* on August 11, the United States Mint reported that it has recovered **10** additional 1933 $20 Saint-Gaudens. In 1996, a 1933 Double Eagle was seized by the U.S. Secret Service and was returned to the Mint. Following litigation that led to a settlement, the 1933 $20 Saint was issued and then auctioned in New York on July 30, 2002 for $7.59 million. The 10 newly recovered Gold rarities were "illegally removed" from the Philadelphia Mint more than 70 years ago. "They are, and always have been, public property belonging to the United States," said U.S. Mint Acting Director David Lebryk. To insure their security, they will be held in the U.S. Bullion Depository at Fort Knox. Furthermore, the U.S. Department of the Treasury "does not intend to monetize, issue or auction them." Instead, the U.S. Mint will assess the best way for the public to benefit from them.

Certainly early Flowing Hair and Bust coins aren't in the same category as the famed 1933 $20, yet these coins remain very much a part of today's demand. So much so, that holders of early coinage that hasn't been "over dipped" or harshly cleaned can just about name their price. Buyers are extremely happy to receive an attractive EF or AU example for their collection. Dealers have a number of customers in line just waiting to add a few. These items are facing serious demand and many a dealer would be happy to come home from an auction and/or show with just one or two nice pieces. This, and other original fresh material is what they will be chasing after in Baltimore. Some are even hoping to get a jump on the competition by posting strong sight-unseen Bids on the electronic dealer trading networks. Check out the 50 percent increase for PCGS and NGC MS64 $10 Draped Bust, Small Eagle Gold this week. Gains of 30 percent have also been chalked-up for those examples grading MS63. Overall the sight-unseen market is still a little sluggish with continued discounting but we can also detect some support starting to return. The popular and important Morgan Dollar series is actually sporting a host of plus signs this week. Of course the percentage gained is not much to write home about but it does show that a couple of dealers believe that current prices, for select issues, may represent an attractive buying opportunity. Obviously the generics are still weak as dealers continue to sell-off MS64 and MS66 examples at, or **below** Bid. Besides common date Dollars, discounting is evident for several coins that haven't moved off the shelves in a reasonable amount of time. Dealers need to stay ahead of the curve and so they try to maintain an inventory of rare coins that are actively trading. Notice how the solid demand for keys is responsible for sizable percentage gains in the Mercury Dime series. We have monitored increasing interest in this series over the past few months. Some credit the current attractive levels as the reason for the gain. Obviously the 1945 Philadelphia issue with Full Split Bands is a well-established rarity and many collectors keep it in their sights because it's an important 1940s key to add to their collection. Mint State 64FB examples graded by PCGS posted a 38 percent increase over our last report. Silver Commems are mixed with advances and declines while Gold Commems remain steady. Gold Type is still weak but that will change if Spot holds above $440. Still, some money can be made by taking advantage of the coins that continue to trade below posted sight-unseen Bids. Type is stable except for Matte Proof Lincoln Cents. Increases are appearing in PR66 and PR67 Red with PCGS PR66 examples nearly 12 percent higher.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www cdnpublications com*

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Proof Gold Enjoys Strong Gains
Quality, Rarity Command Bidder's Attention

Last week we found dealers speculating that the Baltimore show would be an improvement over the San Francisco ANA and they were right on the money. Most of the reports following the show were favorable. Better attendance was the first thing that they noticed as the public was readily seen passing by their tables. Retail transactions were taking place as dealers found ready buyers for a wide range of dates and denominations. Many of these collectors are knowledgeable, seasoned numismatists who know what they want and what they want to pay for it. They are interested in rare coins that are relatively problem-free and attractive for the grade. These are the coins that are bringing the strong money on the bourse and at public auction. Demand was evident for many areas of the market with money available for the premium quality examples that jump out at them. Collectors are interested in adding coins to their collection but they are making more prudent decisions concerning strike, luster and eye appeal for each coin at each grade. Like we saw last week the strongest demand seemed to favor pre-1840 coinage. The strength of this portion of the rare coin market is nearly evenly distributed among Copper, Silver and Gold coinage. This demand was plainly visible to dealers on the bourse and to those that attended the Baltimore auction.

The sight-unseen market remains mixed, as it has been for several weeks now. Discounting is apparent with several issues trading lower in a number of series. Proof Singles, generic Morgan Dollars and Gold Commems are easy targets because they are easily replaced. As auction invoices from July and August are still coming due dealers must scramble to keep them covered. However it isn't only the auction bills that are necessitating the blow-out sales of select items. Cash flow is a concern and so it is extremely important to have funds available as fall shows near. For some astute dealers discounting can also mean opportunity. That's because coins continue to sell at prices below current sight-unseen Bids. It may not be possible to catch them all but just snagging one or two can make it worth your while. Franklin Half Dollars, Proof Gold, Buffalo Nickels, Mercury Dimes and Walking Liberty Half Dollars each have sight-unseen Bid increases occurring. Some believe that Franklin Halves have been somewhat overlooked. A few say that select **Full Bell Line** Franklins may be undervalued at current levels and have raised their sight-unseen Bids accordingly. It will be interesting to see if these higher Bids will be hit, or will this material continue to sell in weekly internet auctions for substantially less. Franklins aren't the only Half Dollar making noise this week. Walkers are attracting Bidding attention for examples in the 1930s. Interest is targeting those coins in high quality with MS65 and MS66 being the grades of choice. For example, 1937-S is now Bid at $1,100 in PCGS MS66, up 12 percent for the week and 42 percent since January 7. Mercury Dimes are facing similar quality demand. However Bidders are chasing examples mostly in the 1940s with gains ranging from 3-6 percent. Yet, the 1943 and 1944 Denver examples in PCGS MS67FB are each sporting 29 percent increases this week. In PCGS MS66FB, since January, they are both up 42 percent. However, the 1916-D leads all Mercs with a 114 percent gain since January in NGC MS67. Some late date Buffalo Nickels are higher with, once again, quality being the focal point. **Proof Gold** is scoring some impressive gains as well this week. Again, quality is commanding the attention of Bidders as all Gold denominations increased except for $4 Stellas which have already shot up by as much as 34% in the last 12 months. PCGS Proof 65 thru Proof 66 Gold is receiving the majority of increased Bids as many five-figure coins head higher. These sight-unseen Proof Gold Bids are just another sign that serious money is sitting on the sidelines just waiting to buy quality, rare coins. Finally, notice also that the popular Isabella Quarter Commem is higher in PCGS grades MS65 thru MS67.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Mercury (Dimes) Rising
Sight-Unseen Market Remains Mixed

Dealers are pleased with the progress of the rare coin market now that two thirds of the year has been completed. We don't see the runaway express train type market that marked the activity level seen for much of 2004, but according to many dealers, the bull is still in control. They credit the collector base as being the driving force as the market moves forward. These knowledgeable buyers are aggressive and it's their tenacity that has kept the demand level where it is today. Dealers are readily servicing these collectors by advising them and offering their expertise. Yet, it is also helpful when they point out the particular coins that appear to be undervalued and the coins that are ripe for selling. Population reports, auction results and dealer inventories can provide some information but there is no substitute for experience. The more information one has the safer one feels in making buying and selling decisions. So we begin the final third of the year with optimism as dealers have expressed good things ahead for the market. For many, the September 22-24 Long Beach Expo is the kick-off for the fall season. Expectations are already running high as dealers and collectors alike begin somewhat refreshed following their summer vacations. September results should tell us what we can expect for the remainder of the year. In the meantime, dealers are busy trying to find those tough dates for their customers in time for the December holiday season.

Mercury Dimes are the powerhouse of the sight-unseen market this week. Increases are plentiful, especially for PCGS Full Band examples grading MS65 thru MS67. Buyers are certainly looking for quality (remember last week's theme?) and we see significant percentage increases for select dates in these grades. The emphasis is for coins dated in the late 1920s and the 1930s. It is also targeting very affordable coins that range from $30 thru $370. The largest jump, at 21 percent, is turned in by the 1923 in MS65FB. Interest in this material indicates demand from collectors with a modest budget. Silver Commemoratives are mixed with plus signs outnumbering the minus. Iowa and Isabella are providing a one-two punch with increases covering several grades. Yet discounting is also occurring for few issues as well. Overall, however, the sight-unseen market continues mixed with dealers trying to push out some coins in preparation for a busy September. Standing out in the crowd of decreasing issues are generic Morgan Dollars. Quantities of these cartwheels have been trading sight-unseen, dealer-to-dealer, in MS63 thru MS65 at **reduced** levels. These common dates, were trading a bit higher in March when MS64s and MS65s hit $45 and $114 respectively. However their availability is such that dealers don't mind selling them to raise additional funds. Besides the common we also see some slightly better dates trading lower. On the bright side, interest is evident for the tough 1892-CC issue in several grades. This Carson City Dollar often gets overlooked because of the 1893-CC, which is much more popular. However the 1892-CC is also found on many collector want lists. Some weakness appears within U.S. Gold Type. Spot has failed to break-out over $440 and so some collectors have pulled back, waiting for a clearer direction. Mint State and Proof Type are quiet and even Proof Gold Type is unchanged, but still holding on to last week's gains. Discounting, peppered throughout, is not as prevalent as we saw several weeks ago. Still, there is an opportunity to capture a few coins that continue to fall through the crack. Check out a few MS65 and MS66 Walkers for example. A 1935-S in PCGS MS65 traded at auction for $2,300 while sight-unseen Bidders are paying $2,500 for up to five coins. At least five examples have sold in auction since May for $2,300 or below. At least one NGC MS66 1936-D Walker sold in auction this week for a mere $710 when Bidders are paying $800 sight-unseen.

At left are a few certified highlights from the September 7-8 Stack's auction that will be held in New York City.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" - Lowest asking price during the week prior to publication (week old); "**m**" - Lowest asking price during the previous three weeks (*m*onth old); "**t**" - *T*rade during the most recent month; "**lm**" - Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

You probably *haven't* seen our work.

All you'll see is a beautiful coin.

A common first reaction to a professionally conserved coin is wonderment. Conservation reduces the ill effects of improper storage or exposure to environmental contaminants—substantially improving a coin's visual appeal.

Most conservation projects involve only the removal of surface impurities, enhancing the vibrancy of the coin's original patina.

Specific conservation focuses attention on a small area of a coin's surface to remove a spot or debris. This eliminates a visual distraction and removes the impurity that may cause further deterioration.

By returning a coin's surface to its original state, its natural beauty shines through. The professional conservation goes unnoticed, and the result is a beautiful coin.

Quality Gold Commems Increase
Major Quarter Eagle Rarities Hit Auction Block

September is upon us and with it comes increased activity as dealers prepare for shows and auctions. This of course means that cash flow will be an important consideration and arrangements should be made now to meet this rigorous demand. It is a time when dealers look to "blow-out" some material that has become stale or just out of favor. This fine tuning process to one's inventory finds dealers striving to hold a fresh mix of rare coins that can keep a ready flow of income. Those dealers utilizing the sight-unseen market find that this "extra helper" allows them to buy and sell such material quickly. Bidding for coins sight-unseen is naturally more conservative because the buyer doesn't know exactly the quality of the coin coming in, but there is still a lot that they do know. The coin has been authenticated and as such, the fear of receiving a counterfeit or altered dates is virtually removed. It also has received a third-party grade. Of course many have a preference as to what professional grading service they desire but at least they have a working knowledge of what can be expected before the coin arrives. Raw coins, on the other hand, are bought with little guarantees and so the risk is greater. Consequently most choose to deal in certified coins, not only because it gives them added confidence but also because their customers demand that extra insurance.

The sight-unseen market has been mixed in past weeks and that pattern continues in early September. With the rare coin market being somewhat cyclical we see that it's Gold Commemorative's turn to grab some headlines. Strong sight-unseen Bidding is occurring for PCGS and NGC Gold Commems. Buyers are willing to shell-out more than $1,000 per coin as increases range from 3 to more than 11 percent for various MS64-MS67 specimens. Proof Gold is also continuing its heightened interest from Bidders. Gains are small from 1-2.5 percent but at a minimum price tag of $5,900 each the increase in absolute terms is noteworthy. There also seems to be a substantial number of elevated Bids for ICG coins covering many areas of the market. This portion of the market has been more volatile, primarily because the population of ICG coins doesn't approach that of other services that have been around much longer. Those that stay on top of things stand to make some quick opportunistic profits. Caution should also be employed in one's thinking as a thin market means greater risk so prudence is necessary before one proceeds on this course. However, this week's sight-unseen trading is also offering up some issues at discounted prices. We know that coins that are fairly easy to replace are generally the ones that are targeted for quick sale. Morgan Dollars are arguably the most popular series and we even note a pair of rarer coins advancing as the 1879CC Capped Die and 1892S will attest. However a majority of the dates are also available in quantities that allow dealers to sell some to raise funds. Coins also become attractive for quick sale if they can be sold at a level that's higher than its original purchase price. Morgan Dollars as a whole have done very well in 2005 so dealers don't mind parting with a few. Those seen declining are mostly common or slightly better dates with Bids below $800, and they should be an easy replacement in the future when needed. Again those participating are primarily generic issues that are Bid lower in MS62 and MS64 with a few MS65 examples hit as well. We even see some common date Peace Dollars participating with the majority being of MS64 classification. At $30-$45 per coin it may not seem like a lot of money but considering that these are usually held in quantity, a roll could generate a quick $600-$900. Again as with the Morgans at the MS64 grade level these are also rather easy to replace. Mint State Type Gold is another area that's lower this week but that status can change quickly. Spot Gold is quite volatile right now as economic forces come into play following hurricane Katrina's rampage and devastation through the Gulf region. A spot check also reveals minor discounting for Walking Liberty Half Dollars and a few Proof Singles. American Numismatic Rarities will host the C.L. Lee Sale September 18th in Los Angeles. We have listed some of its many highlights.

You probably *haven't* seen our work.

All you'll see is a beautiful coin.

A common first reaction to a professionally conserved coin is wonderment. Conservation reduces the ill effects of improper storage or exposure to environmental contaminants—substantially improving a coin's visual appeal.

Most conservation projects involve only the removal of surface impurities, enhancing the vibrancy of the coin's original patina.

Specific conservation focuses attention on a small area of a coin's surface to remove a spot or debris. This eliminates a visual distraction and removes the impurity that may cause further deterioration.

By returning a coin's surface to its original state, its natural beauty shines through. The professional conservation goes unnoticed, and the result is a beautiful coin.

High Value Rarities Wanted Sight-Unseen Anticipation Important Ingredient For Success

Last week we thought that September would be a month with increased activity. True to form it's already occurring on the electronic dealer trading networks. However while we expected the activity to be taking place in the sight-seen market, via auctions, shows and network Bidding, we didn't expect as much interest, initially, in the sight-unseen market. Yet, there is a barrage of sight-unseen increased Bids this week covering several areas. Dealers, undoubtedly, are in need of coins and they are willing to use this time effective avenue at their disposal in order to capture some needed coins quickly. They also know that purchasing this way usually nets an average to below average example for the assigned grade; this is the accepted trade-off when using this sight-unseen method for buying. Yet, quality is definitely on their want lists as it is readily apparent by the vast number of high grade coins that are advancing this week. Rarity is also a determining factor as select high value rare coins are coveted. Some are of the opinion that many of these pieces are still displaying Bids that are considerably too low even within the sight-unseen market, given their rarity and quality.

Could anticipation be a factor? Some dealers expect for Spot Gold to climb above the $450 bench mark and if it does, big spenders will likely jump from the woodwork and look to diversify into Mint State 65 and Proof 65 and better Type, early Gold, Proof Gold, etc., as well as bullion. Getting a jump on this material before the demand hits may prove to be a prudent move. Dealers need to think ahead and have their inventory and cash ready for the upcoming Long Beach Expo and Pre-Long Beach auctions that are all scheduled to begin September 18 in California.

For the past several weeks now we have been pointing out the strong interest occurring for early Gold. Early Gold is expensive but it also offers collectors rarity, history and a proven solid track record. Such documented information allows collectors to buy with confidence. The willingness for serious collectors to pay four- and five-figures for a rare coin surely demonstrates the credibility of the current bull market. It also says something about where they believe the market is headed in the near future. Dealers that are willing to post strong sight-unseen Bids for the same speak volumes about the staying power for the bull market as well. Apparently cash flow positions are improving with significant advances made in Mint State Gold, led by — you guessed it, the $3 Princess. In MS65 and MS66 she gained 25 and 21 percent respectively. Like early Gold, increases among Proof Gold demonstrates the strength in the high end side of the market as Proof $3 Princesses jumped 9 percent in Proof 66. As always, it is imperative to keep a ready supply of coins that collectors are clamoring for. It doesn't do any good to have a rare date coin that's out of favor at this time.

Mint State Type is featuring some impressive sight-unseen increases this week. Capped Bust and Liberty Seated issues are certainly in demand. Reduced Size Capped Bust Dimes are leading the pack, showing a quantum leap for PCGS specimens in MS65 and MS66. Liberty Seated No Motto Quarters are also thriving, with a healthy jump evident in PCGS MS66. Very scarce Barber Halves in MS67 are wearing a 40 percent hike. Silver Commemoratives continue to command interest with MS65 and better material enjoying the strongest demand. We note several issues displaying double digit Bid increases this week as the Texas Centennial Type jumped more than 35 percent in PCGS MS67 to $480 Bid. The Oregon Trail Memorial series is also popular, currently with MS65 thru MS67 grades demonstrating solid increases. Buffalo Nickels that have been quiet for quite some time are making some noise this week. Many of the later dates of the series, mostly in MS65 and MS66 are a bit higher.

Yes, there are some areas of the market that are still being discounted but this may just represent the selective process of rearranging one's inventory. Morgan Dollars are mixed with emphasis on the negative side. For the most part, common Dollars grading MS63 thru MS66 are being discounted. Walkers are also mixed with the higher quality MS65-MS67 examples in the 1940s lower while scarcer dates in the teens grading MS63-MS64 are increasing.

PCGS' parent company, Collectors Universe announced the purchase of the industries largest dealer-to-dealer electronic coin trading network: the Certified Coin Exchange (CCE) for $2.18 million. Collectors Universe will be creating a new subsidiary corporation, Certified Assets Exchange (CAE) to manage CCE. Expanded services for both dealers and collectors are already being planned for the internet based trading network.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.
